

CHAIR 14 WITH LAMINATE

Wooden chair with charmingly simple and contemporary design in both.

Frame of the chair is made from solid birch. Seat and backrest birch plywood. Finished with a slightly white tone varnish, so the wood tone is naturally light birch. Seat and back are covered with laminate. Legs include plastic floor glides. Chairs are stackable. Weight 5,2 kg.

In the same chair family as a "Mini" version are available children's chair with seat height 35 and 38cm and high children's chair "14 mini 50cm" with footrest.

LAMINATE is a surface material which is used on furniture details that demand high resistance. It is possible to choose among birch imitation laminate or colored laminate. Laminate is wearproof, durable to scratches and bumps. Surface is easy to clean. As laminate is sunfast, the colorful appearance of the chair stays changeless for years.

STANDARD LAMINATES

OPTIONAL EQUIPMENT

- Felt floor glides
