The control of the chair's strength and hardness is executed in Tallinn University of Technology. European Standard EN 1729-2:2006 "Furniture – Chairs and tables for educational institutions – Part 2: Safety requirements and test methods".

LAMINATE is a surface material which is used on furniture details that demand high resistance. It is possible to choose among birch imitation laminate or colored laminate. Laminate is wearproof, durable to scratches and bumps. Surface is easy to clean. As laminate is sunfast, the colorful appearance of the chair stays changeless for years.
